JAVASCRIPT EVENT HANDLING

Q: Evaluating javascript event handling for every click of a button to change the background color of a HTML page

programme:

```
<html>

  <head>

    <title>

      How to change the background color

      after clicking the button ?

    </title>

  </head>

  <body style = "text-align:center;">

    <h1 style = "color:green;" >

      JAVASCRIPT EVENT HANDLING

    </h1>

    <p id = "GFG_UP" style =

      "font-size: 16px; font-weight: bold;">

    </p>

    <button onclick = "gfg_Run()">

      Click here

    </button>
```

```
<p id = "GFG_DOWN" style =  
    "color:green; font-size: 20px; font-weight: bold;">  
</p>  
  
<script>  
    var el_up = document.getElementById("GFG_UP");  
    var el_down = document.getElementById("GFG_DOWN");  
    var str = "Click on button to change the background color";  
  
    el_up.innerHTML = str;  
  
    function changeColor(color) {  
        document.body.style.background = color;  
    }  
  
    function gfg_Run() {  
        changeColor('yellow');  
        el_down.innerHTML = "Background Color changed";  
    }  
</script>  
</body>  
</html>
```

output:

JAVASCRIPT EVENT HANDLING

Click on button to change the background color

Click here

button clicked

JAVASCRIPT EVENT HANDLING

Click on button to change the background color

Click here

Background Color changed
